TRITON'S SURGE DISC BRAKES provide superior stopping power and less maintenance over electric brakes. A free backing valve allows you to go in reverse without locking up.

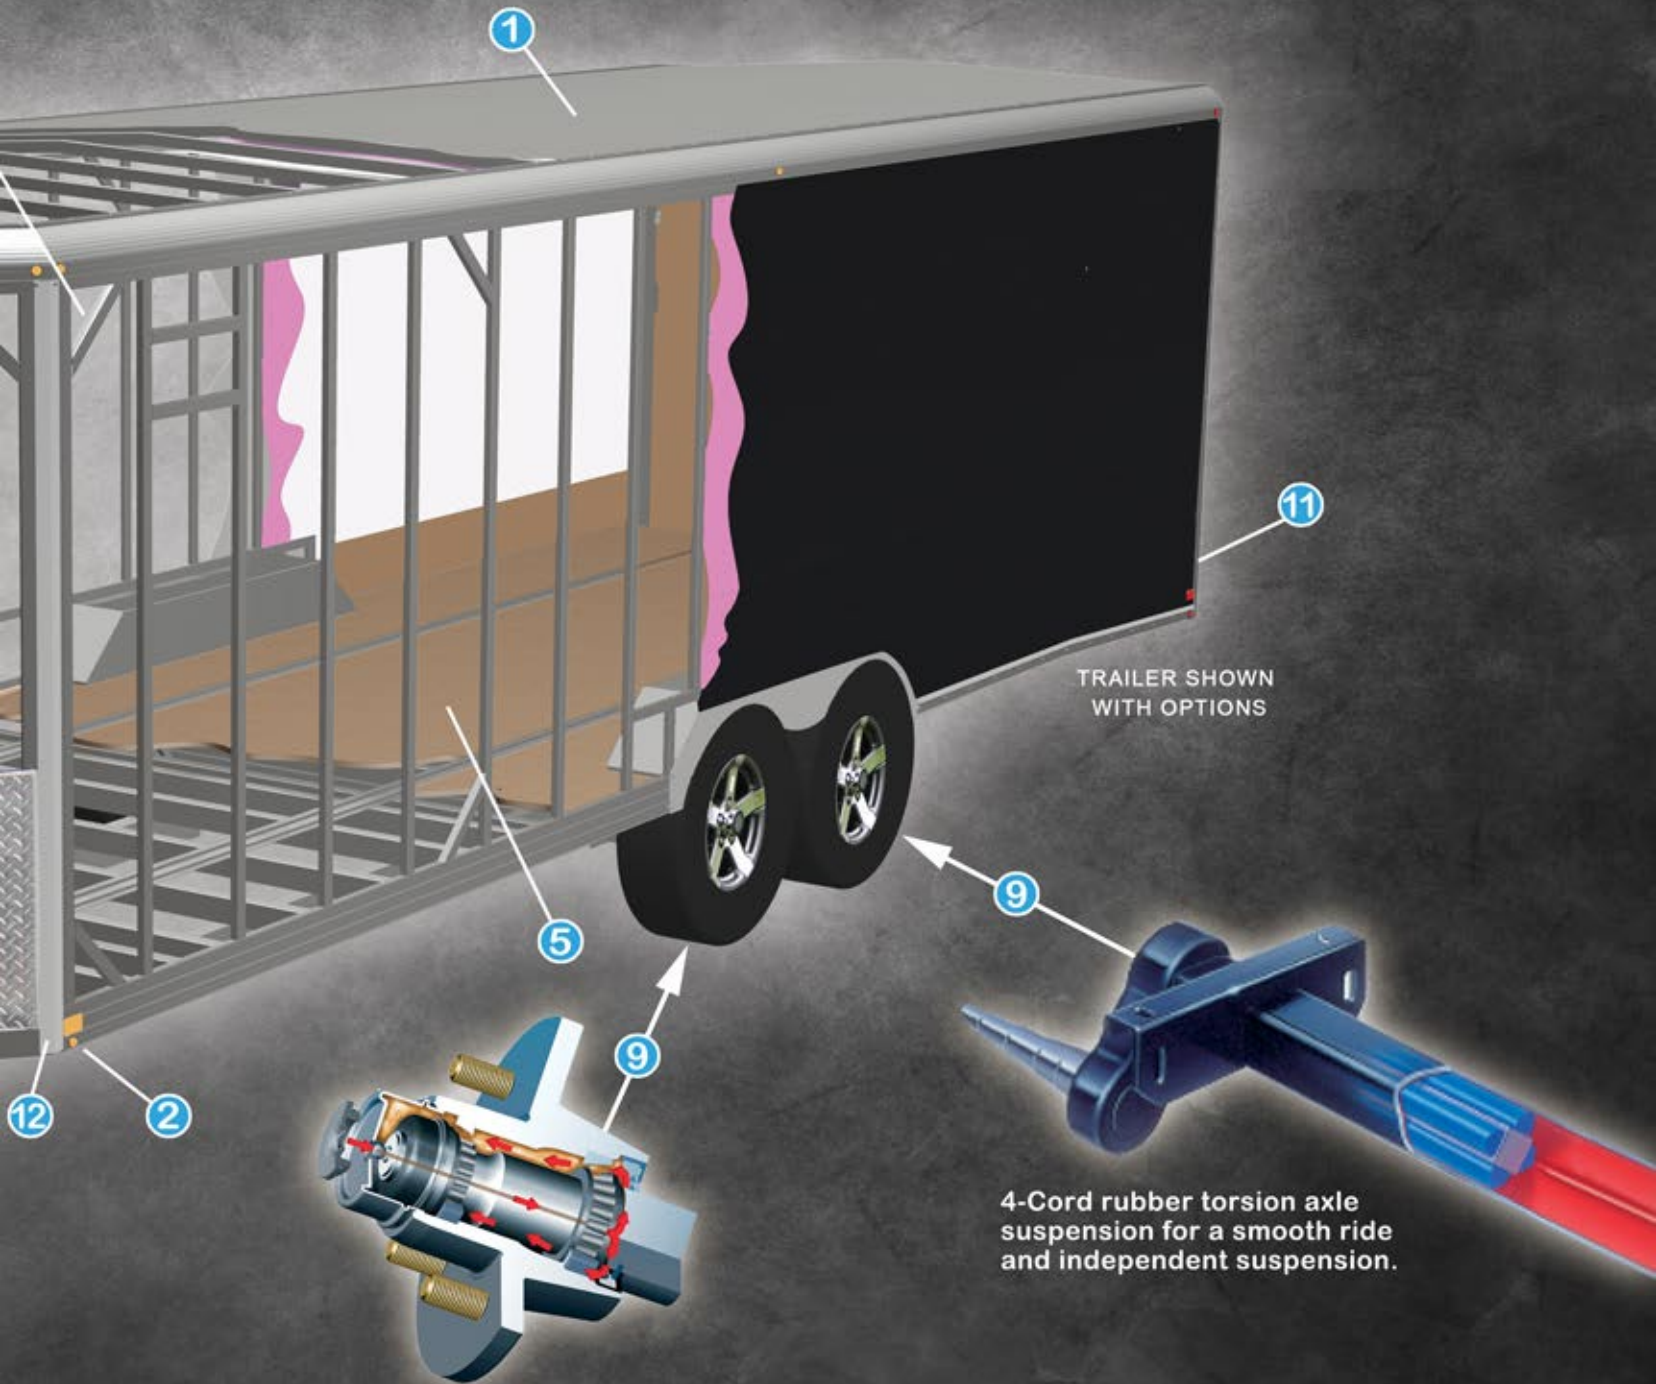

NEV-R-ADJUST electric drum brakes by Dexter saves time and money by eliminating the manual adjustments needed for optimal drum brake performance and stopping.

Triton has a five year Limited Warranty on fully enclosed trailers from the date of purchase when the trailer is warranty registered. See your dealer for details.

TRAILER SHOWN WITH OPTIONS

4-Cord rubber torsion axle suspension for a smooth ride and independent suspension.

Premium flow through grease system for long bearing life and easy maintenance. Repack your bearings by pushing the new grease past both bearings without taking your hubs off.

*Hitch Height of ball will increase 4" if equipped with Surge Disc brakes. Measure your vehicles for actual needed model size. Recommended tongue weight for enclosed trailers is 7-10% of GVWR. Please note: It is the responsibility of the purchaser to adhere to the brake laws regarding trailers. For full information on trailering laws, contact the appropriate Motor Vehicle Department. Brake options will change the overall length of trailer. Contact your local Triton dealer for order lead times. All trailers ordered without brakes will have a GVWR of 2995#. Specifications, & accessories can change without notice.
